EFFECT of HEAT and AIR on MOVING FILM of BITUMEN

Product Code

UTB-0260E	Solubility Test Set for Bitumen and Bituminous Binders
UTGG-2005	Filter Flask, 500 ml
UTGG-2240	Gooch Crucible, Glass, for UTB-0260
UTGG-2242	Funnel for UTB-0260, Glass
UTGG-2244	Powdered Glass, for UTB-0260, 100 g
UTGP-1222	Rubber Stoper with a hole, for UTB-0260
UTGP-1226	Rubber Ring, for UTB-0260
UTGG-3590	Water Trompe/Aspirator Filter Pumps for Vacuum Filtration with Anolog Manometer

Standards

EN 12592

Solubility Test Set is used for determining the degree of solubility of bituminous binders having little or no mineral matter other than recovered bituminous binders from asphalt mixes.

The test set includes of a filter flask, a sintered glass crucible, a funnel, 100g powdered glass, a rubber ring and a rubber stopper.

UTGE-3590 Metal water trompe/aspirator filter pump is supplied complete with 2m plastic tube, 1m rubber tube and 4 pcs. tube clamps.

Solvent and water trompe shoud be ordered seperately.

Dimensions	300x250x300 mm
Weight (approx.)	15 kg
