UTEST

MATERIAL TESTING EQUIPMENT

UTEST is the leading manufacturer and supplier of Testing Equipment for Construction Materials in Turkey and has become a well-known and trusted company Worldwide

UTEST produces testing machines and equipment for construction materials such as Soil, Concrete, Cement, Aggregate, Asphalt and Rock. We have more than 100 expert and qualified employees undertaking the production activity in a 13,500 m² closed area in the Sincan Organized Industrial Zone in Ankara. In addition to the factory in Ankara, UTEST has a branch in Fort Lauderdale, Florida that provides sales support and technical assistance to the distributors in Americas.

UTEST has adopted the primary policy of offering a high-quality and wide range of products and services that comply with the international standards by prioritizing customer needs and expectations through its qualified personnel.

UTEST offers its services in a customer-oriented manner with its Qualified and Experienced staff

UTEST offers its services by giving priority to customer satisfaction in the design, manufacturing, and supply of Testing Equipment that comply with the international quality standards. UTEST also designs special testing systems and devices to be used in quality control and R&D activities alongside its mass production line. UTEST Manufactures all equipment, software, and hardware within its own facilities, including CNC machining, welding, painting, and assembling.

All UTEST products are tested to guarantee high quality, reliability, and performance that is backed by international standards and warranties. As part of our clients' product investment, UTEST provides substantial after-sale services as well. Years of experience, a proven track record, and carefully managed and audited quality systems are in place to meet customer requirements. Within its high technology, quality control, and calibration laboratory, all products are tested in each step throughout the production process and calibrated before leaving the factory.

www.utest.com.tr

UTEST is all around the World

UTEST exports its equipment to more than 40 countries such as the United States of America, Canada, Mexico, Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, Panama, Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Paraguay, Peru, Uruguay, Italy, Belgium, France, Germany, United Kingdom, Australia, Vietnam, Romania, Libya, Saudi Arabia, Tunisia, Azerbaijan, Georgia, Turkmenistan, Kazakhstan and many others. Also, to the Middle East and many other African countries by offering its services through its authorized distributors and representatives. With its new branch in Fort Lauderdale, Florida, UTEST managed to be the first Turkish firm in its sector to establish a branch in United States and took another step to fulfill its goal of becoming a leading global player in Material Testing Equipment sector.

UTEST has a wide customer portfolio that includes leading companies that operate in many different business sectors

UTEST frequently works with the construction companies that carry out worldwide projects, private laboratories, universities and state institutions such as mineral research and exploration, roads and highways, environment and city planning or hydraulics, irrigation and hydrology departments among many others.

UTEST is the first choice in the sector

All UTEST products are designed, analyzed, and manufactured by using the most recent and latest technology. UTEST is continuously improving itself due to its target of excellence in total quality throughout the entire business. UTEST primarily undertakes the responsibility of fulfilling customer expectations and has become the first choice in the sector thanks to its high quality and reliable equipment which includes its substantial technical services.

A quality assurance system, conforming with ISO 9001: 2008, has been installed to ensure a high standard of production. As the major supplier of testing equipment used for quality control, it is essential for UTEST to apply the same principles in its own procedure and production methods.

UTEST LABORATORY FURNITURE

New Generation Laboratory Furniture

- It is manufactured to facilitate laboratory and heavy research equipment and applications.
- Our laboratory systems; easily adapts to equipment changes and laboratory refurbishment projects.
- It is designed to minimize dependency on the infrastructure of your building via using connections (gas, water and electricity) inside the modules.
- We handle your laboratory projects from the beginning to the end by reducing shipping convenience, installation and operation costs.
- UTEST offers laboratory equipment research and consultancy services, we prepare engineering drawings like 3D models and presentations of your desired laboratory. These services are planning, installation and field operations, and all kind of engineering solutions which are specific to your projects.
- During the design process, we make a presentation by preparing the 3D model presentation of your laboratory with the equipment in a realistic way. In this way, it is possible to see the final version of your laboratory before starting production.
