
ELONGATION INDEX

Product Code

UTA-0455 Length Gauge (Elongation Index BS)

Standards

BS 812-105.2

Length Gauge (Elongation Index BS), is used for determining the elongation index of aggregates. The particle is elongated when its length (longest dimension) is more than 1.8 of the midsize of the sieve fraction. The aggregate to be classified is separated into six sieve fractions from 6.3 to 50 mm, and each fraction is examined separately.

Dimensions	70x370x70 mm
Weight (approx.)	0,90 kg
